

HOSPICE PHILOSOPHY

Hospice provides support and care for persons in the last phases of an incurable disease so that they may live as fully and as comfortably as possible. Hospice recognizes that the dying process is a part of the normal process of living and focuses on enhancing the quality of remaining life. Hospice exists in the hope and belief that through appropriate care, and the promotion of a caring community sensitive to their needs that individuals and their families may be free to attain a degree of satisfaction in preparation of an inevitable event. Hospice seeks to promote the inherent potential for growth within individuals and families during the last phase of life.

Physical, social, spiritual, and emotional care are provided by a clinically-directed interdisciplinary team consisting of patients and their families, professionals and volunteers.

Reliable and trusted partner in meeting your palliative and hospice care needs.

WHAT IS HOSPICE?

Hospice is a philosophy of care that focuses on providing comfort and support to people facing life-limiting illness or injury as well as to their families.

WHERE CAN I RECEIVE SERVICES?

Hospice patients are cared for in their home wherever the home may be (patient's home, home of relative or friend, or a nursing home).

WHO PAYS FOR HOSPICE?

Medicare and Medicaid cover the full cost of hospice care. Most private insurance covers hospice as well.

SHOULD I WAIT FOR OUR PHYSICIAN TO RAISE THE POSSIBILITY OF HOSPICE, OR SHOULD I RAISE IT FIRST?

You should feel free to discuss hospice care at any time with your physician, other healthcare professional, clergy, family, or friends.

WHAT IF I CHANGE MY MIND ABOUT HOSPICE?

Hospice is a choice. A patient may choose to leave anytime. A patient may also be discharged if a patient shows signs of improvement, and the disease seems to be in remission.

WHAT SERVICE DOES CREEKWAY HEALTHCARE PROVIDE?

Registered Nurse

Our Registered Nurse coordinates care with a team of physicians, nurses, home health aides, social workers, spiritual counselors and volunteers. They also visit their patients routinely for medical assistance, medication coordination, instructions, and support.

Hospice Aides

Our hospice aides provide assistance in activities of daily living (including personal hygiene and grooming, dressing, ambulation, bathing, etc.) and light housekeeping.

Social Worker

Our social worker counsels patients, families and caregivers to assess and coordinate needs with other community resources and to assist with financial concerns. They can also assist with funeral arrangements.

Volunteers

Our volunteers can provide fellowship, company and support for patients and respite for caregivers.

Counselor

Our counselor provide a variety of services including dietary counseling to patients and bereavement and spiritual support to patients and families.

WHEN TO BEGIN HOSPICE CARE?

Hospice care is most beneficial when it is provided for months as opposed to weeks or days. Patients and families can benefit from considering hospice as soon as it is appropriate so that they may receive the full range of available benefits.

Hospice is not about losing hope, giving up, or even dying. The focus is on maximizing quality of life. As a patient's needs change, hospice can address those needs with a gradual, non-crisis approach minimizing stress for patients and their loved ones.

HOSPICE INDICATORS

Only a physician can determine hospice appropriateness, but here are some indicators to watch for:

- 
- Unrelieved pain
 - Frequent infections
 - Repeat hospitalizations
 - Weight loss
 - Difficulty swallowing
 - Nausea/Vomiting
 - Shortness of breath
 - Declined physical status

Provide quality of life
and care beyond
measure.
